My friend has been looking for [used BMW in London](#) this weekend. She currently has a Z4 3.0 Convertible but it is getting old now and has clocked up lots of miles. I have suggested she takes a drive down the M25 to Big Motoring World in Kent, where they have around 500 late plate used BMW on display at one site. There will surely be a car of the right spec, mileage and colour and it saves spending days driving to various car dealers to test drive different models. They can arrange car finance too and drive away insurance.
